ABBOTT IS HERE TO PROVIDE ALL
DIGITAL ASSETS FOR YOUR WEBSITE!

When setting up products on your website you will likely require:

- Product images and lifestyle/glam images
- Product descriptions and keywords
- Product titles
- Product sizes and weights

There are three ways to download product images:

Single images

- All web resolution image downloads are available anytime. Simply right-click on the image you want to download, select "Save image as", and save the image to your desktop.

Batch download

- It is possible to batch download all of the product images that are associated with a single order by following these steps:
- Go to My Dashboard (after logging into your account)
- Go to Orders/Invoices
- Go to either View Orders or View Invoices
- Select on an order, a cart, or an invoice and then open it
- Click on the icon of the cloud with the arrow at the top right of the page
- By clicking on this icon, all the images for the order/cart/invoice should download to your desktop as a single stuffed file. Open this file and all of the product images should be there.

All images of a single product

- Open a product page and click on the cloud icon at the bottom left corner of the page - this will allow you to download all the images for a particular product at once as a stuffed file. Once this file has been downloaded, it will need to be "unstuffed" in order to access all the images.

Other Product Data

- All product data can be copied and pasted from the product page (description, sizes, weights, etc).
- For product keywords, please email gifts@abbottcollection.com
